
STABIVIN SP

Codex gum arabic solution, with a very low clogging index

SPECIFICATIONS

STABIVIN® SP is a gum arabic solution manufactured from highly purified gums. The specific manufacturing conditions guarantee a preparation with a very low clogging index.

OENOLOGICAL PROPERTIES

Due to its specific manufacturing procedure and the strict selection of the gum arabic used, **STABIVIN® SP** contributes to the colloidal structure of the wines.

PROTOCOL FOR USE

DOSAGE

Average dosage: 100 to 300 mL/hL.

IMPLEMENTATION

STABIVIN®SP must be used on perfectly clarified wines. It can be incorporated after filtration by using an **OENODOSEUR** or a feed pump controlled by the filler.

STORAGE

In original, sealed packaging, use within the specified use-by date.

PACKAGING

1,1 and 5,5 kg bottles.

22 kg jerrycan.

132 kg barrel.

1000L container.
